The following listing of claims will replace all prior versions and listings of claims in this application.

Listing of Claims:

Claim 1 (currently amended): A modified compound 8 to 50 nucleobases in length targeted to a nucleobases 1345 through ~~1474~~ 2976 of a coding region of a nucleic acid molecule encoding human collapsin response mediator protein 2 (SEQ ID NO: 3), wherein said compound specifically hybridizes with said nucleic acid molecule encoding human collapsin response mediator protein 2 and inhibits the expression of human collapsin response mediator protein 2.

Claim 2 (original): The compound of claim 1 which is an antisense oligonucleotide.

Claim 3 (canceled).

Claim 4 (original): The compound of claim 2 wherein the antisense oligonucleotide comprises at least one modified internucleoside linkage.

Claim 5 (original): The compound of claim 4 wherein the modified internucleoside linkage is a phosphorothioate linkage.

Claim 6 (original): The compound of claim 2 wherein the antisense oligonucleotide comprises at least one modified sugar moiety.

Attorney Docket No.: RTS-0200
Inventors: Gaarde and Watt
Serial No.: 10/006,911
Filing Date: November 8, 2001

Claim 7 (original): The compound of claim 6 wherein the modified sugar moiety is a 2'-o-methoxyethyl sugar moiety.

Claim 8 (original): The compound of claim 2 wherein the antisense oligonucleotide comprises at least one modified nucleobase.

Claim 9 (original): The compound of claim 8 wherein the modified nucleobase is a 5-methylcytosine.

Claim 10 (original): The compound of claim 2 wherein the antisense oligonucleotide is a chimeric oligonucleotide.

Claim 11 (canceled).

Claim 12 (original): A composition comprising the compound of claim 1 and a pharmaceutically acceptable carrier or diluent.

Claim 13 (original): The composition of claim 12 further comprising a colloidal dispersion system.

Claim 14 (original): The composition of claim 12 wherein the compound is an antisense oligonucleotide.

Claim 15 (previously presented): A method of inhibiting the expression of human collapsin response mediator protein 2 in cells or tissues comprising contacting said cells or tissues in vitro with the compound of claim 1 so that expression of human collapsin response mediator protein 2 is inhibited.

Claims 16-20 (canceled).
